According to relevant laws and regulations, you must agree to the Terms of Use before using this product.

Terms of Use

This Terms of Use introduces how Sangfor EasyConnect uses and protects your information. Please carefully read and thoroughly understand the terms. If you do not agree with this Terms of Use, your choice is not to use this product. By using this product or enjoying relevant services, you agree to the terms.

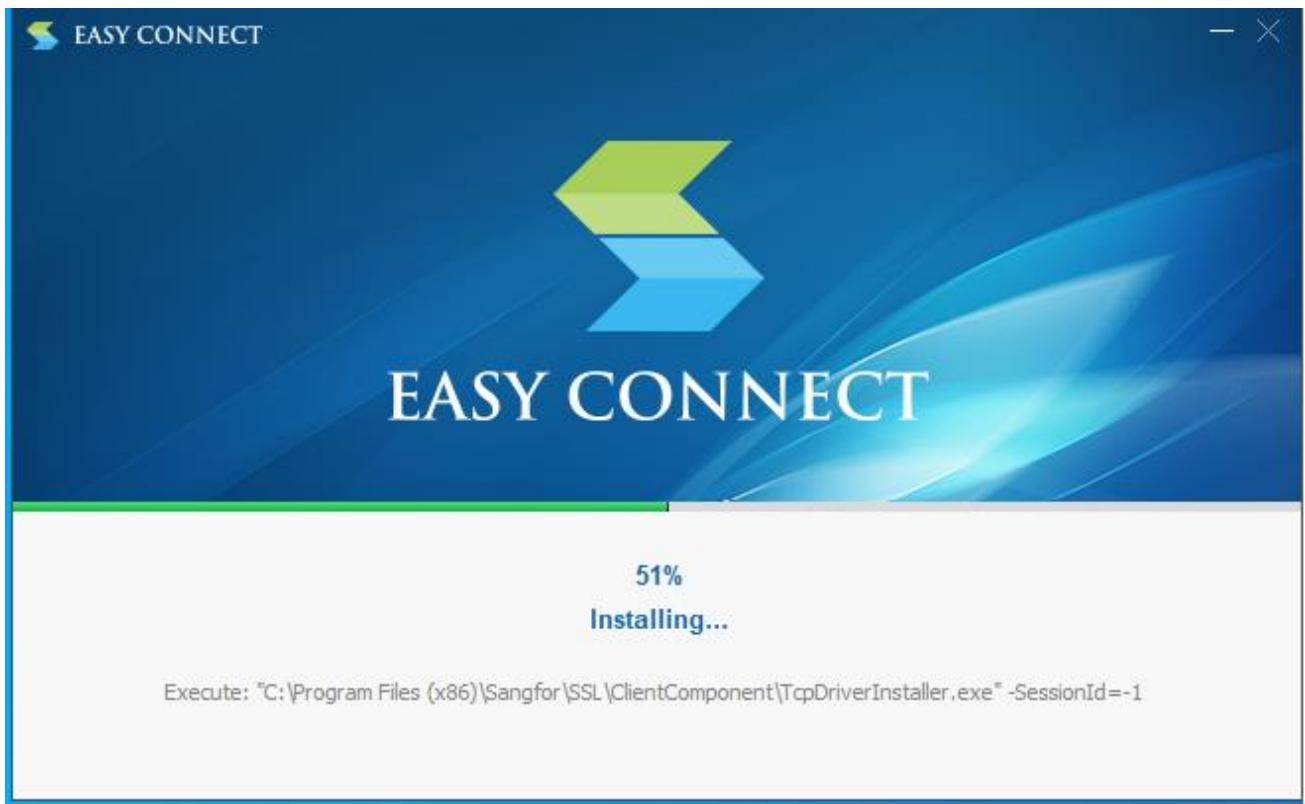

ABOUT THIS PRODUCT

EasyConnect (EC) is a client for SSL VPN developed by Sangfor Technologies Inc. (hereinafter SANGFOR) who is committed to providing users with secure and more easy-to-use remote access solution.

INFORMATION COLLECTION AND STORAGE

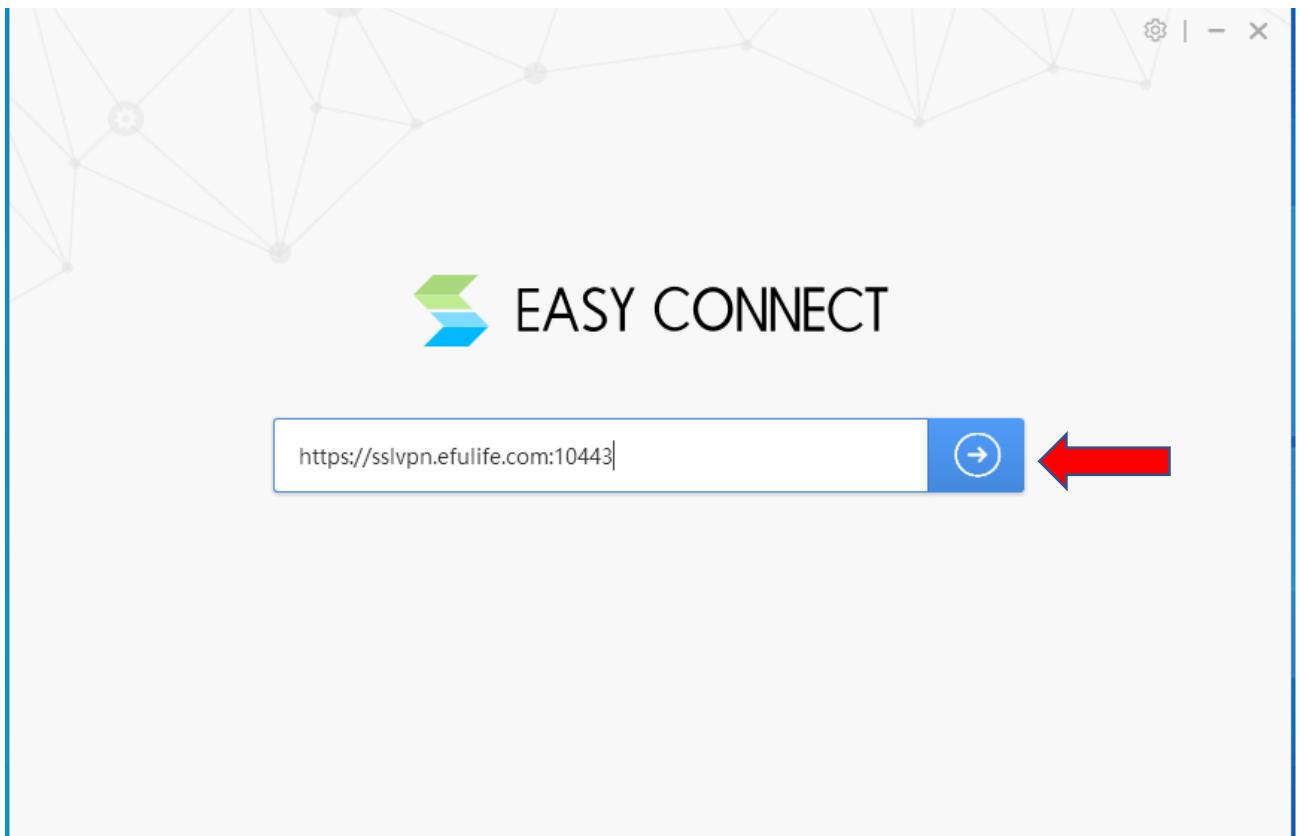

1. You permit EasyConnect to collect the following information and grant some permissions of your mobile devices to enable EasyConnect to offer basic and additional functionality. Information includes the following and other necessary information.

→

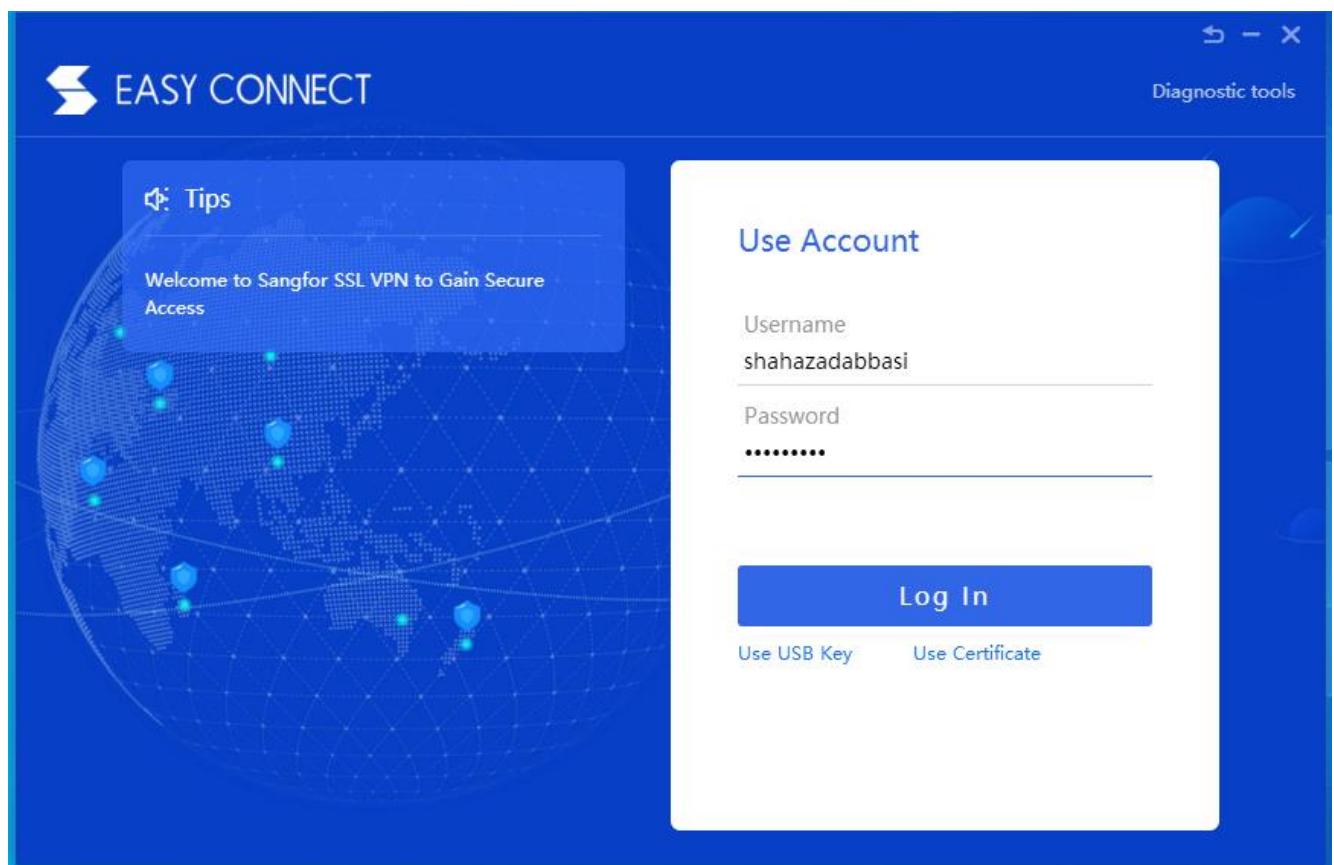

Step 3:

Type "<https://sslvpn.efulife.com:10443>" and click on arrow button.

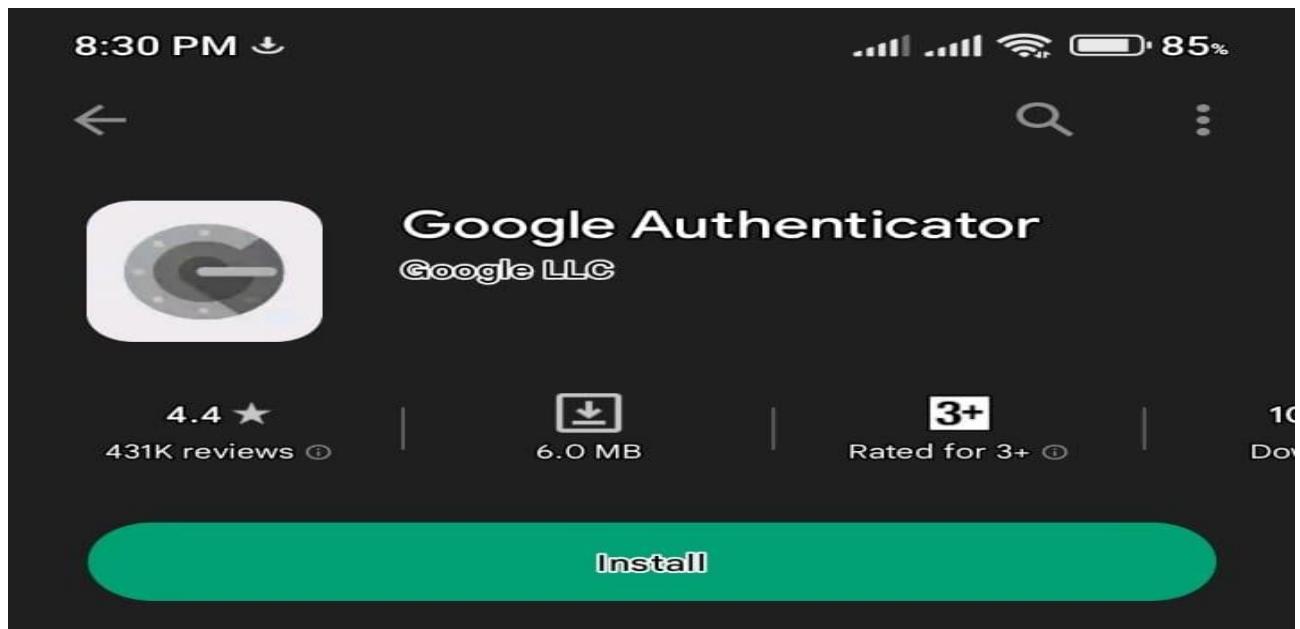

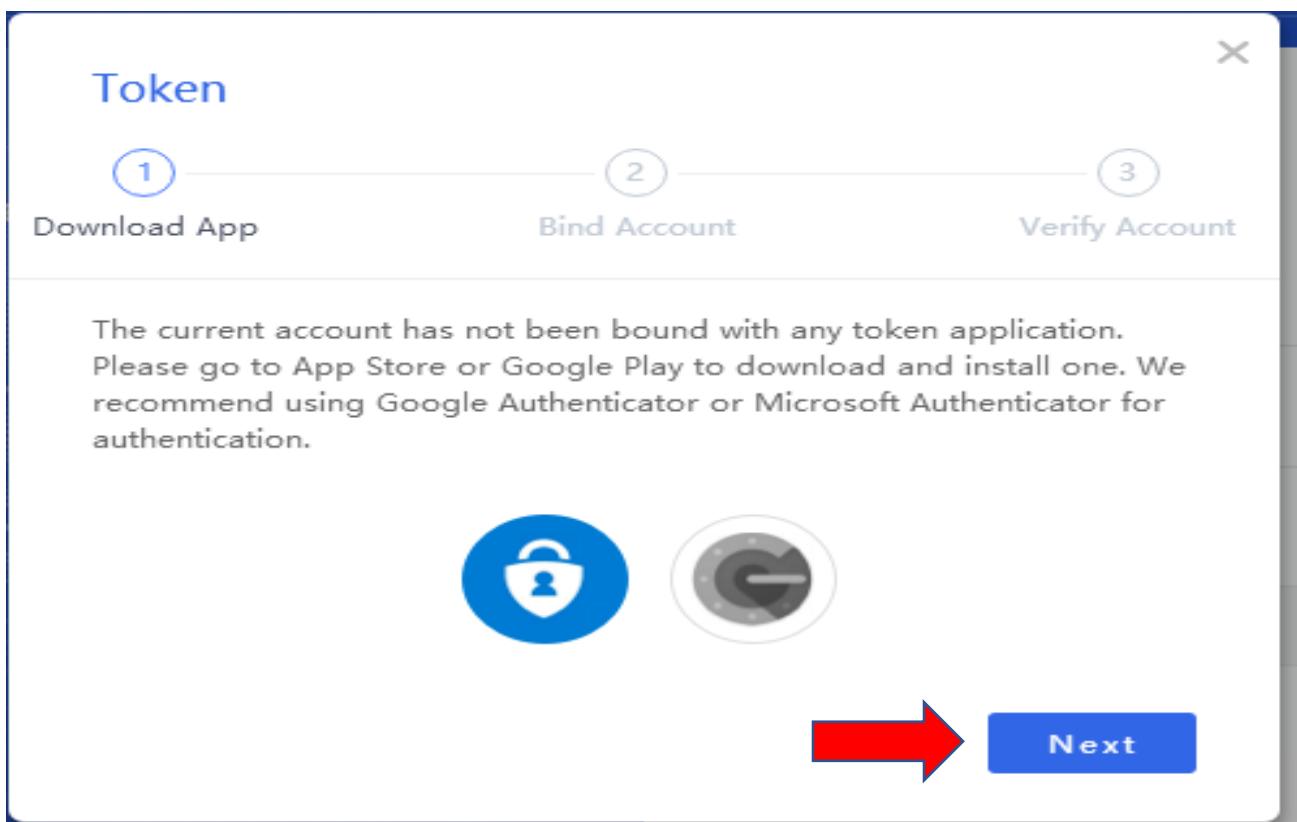

Step 4:

Enter your Domain Username and Password and login.

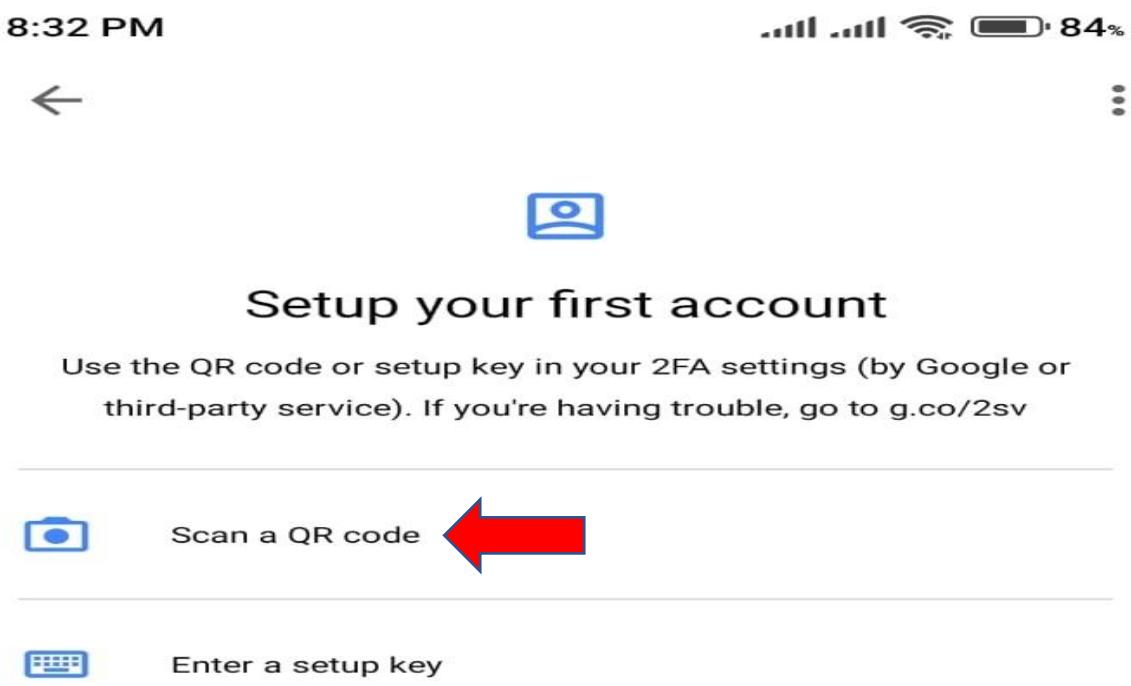

After Logging your username and password go to Play store (i.e. Android Users) or App store (i.e. For iPhone Users) download and install “Google Authenticator App” then click “Next” button.

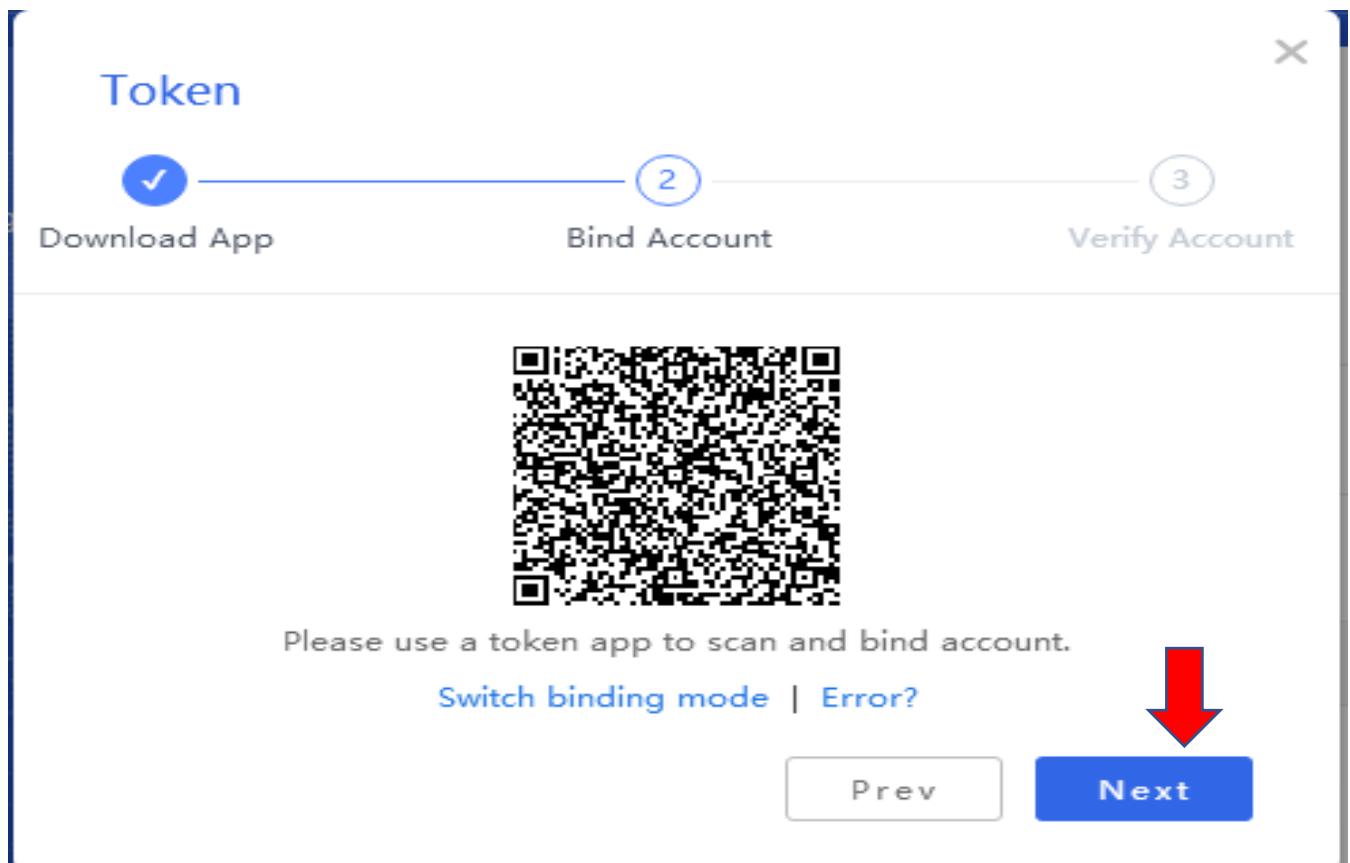

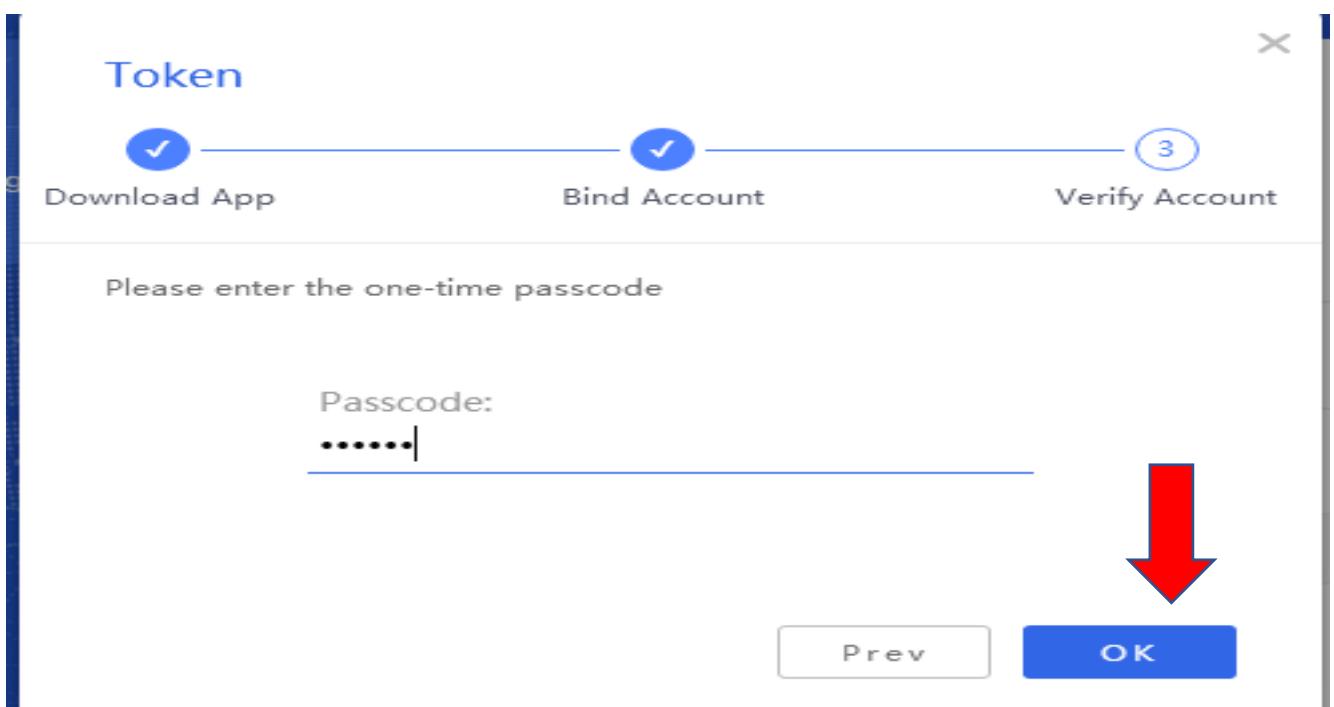

Step 5:

Open the Google Authenticator App and click to “Scan a QR Code”.

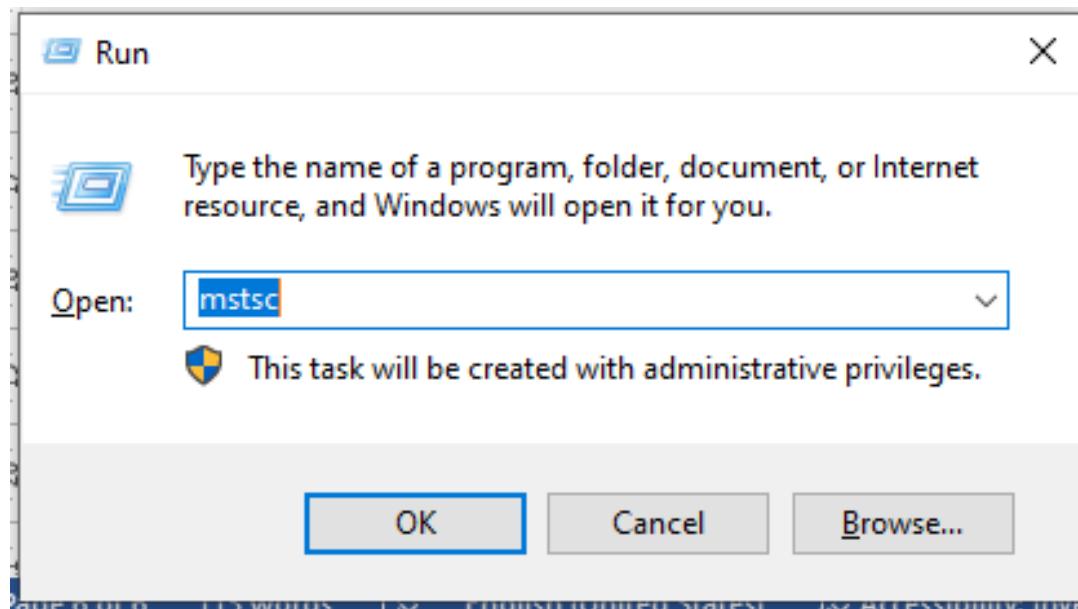

On your App you will receive a “one-time passcode” or “Token” and then press “OK” button.

The screenshot shows the EASY CONNECT software interface. At the top, there's a blue header bar with the 'EASY CONNECT' logo and search fields for 'Search Resource' and 'Search term'. Below the header, a section titled 'Default Group' displays a single item: 'EFU full access' with the IP address '172.16.0.1;1-172.16.254.254;...'. There are icons for edit and delete next to the item.

FINAL STEP:

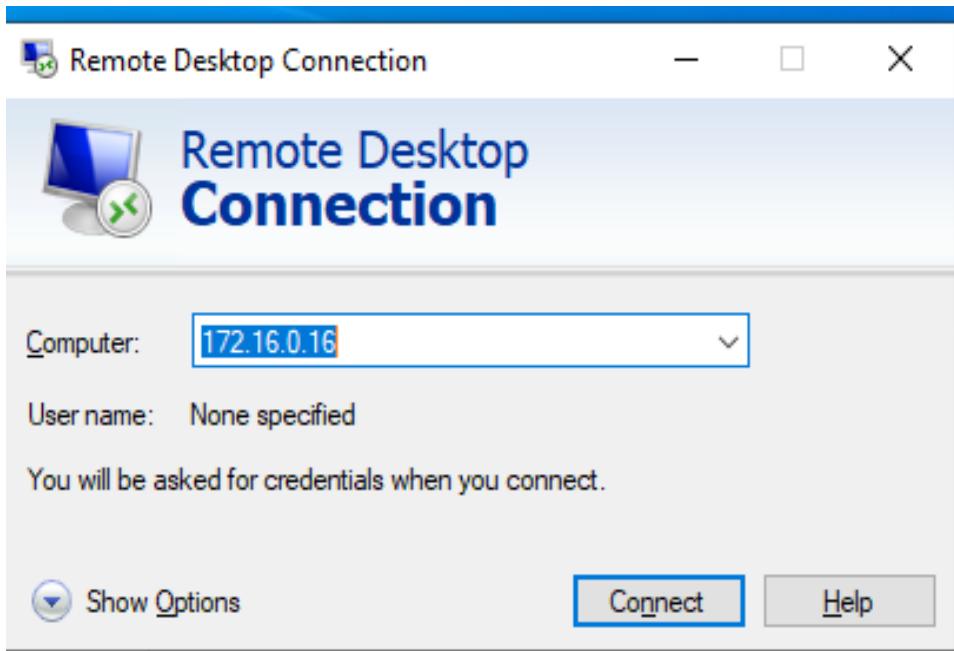

Press “Win + r” button and type “mstsc” then click OK button.

Please enter your system's IP or if you are a thin client user then enter your server's name

For example:

ts-sad, ts-bod, ts-csd, ts-nbd, ts-ga, ts-gbd, ts-acc

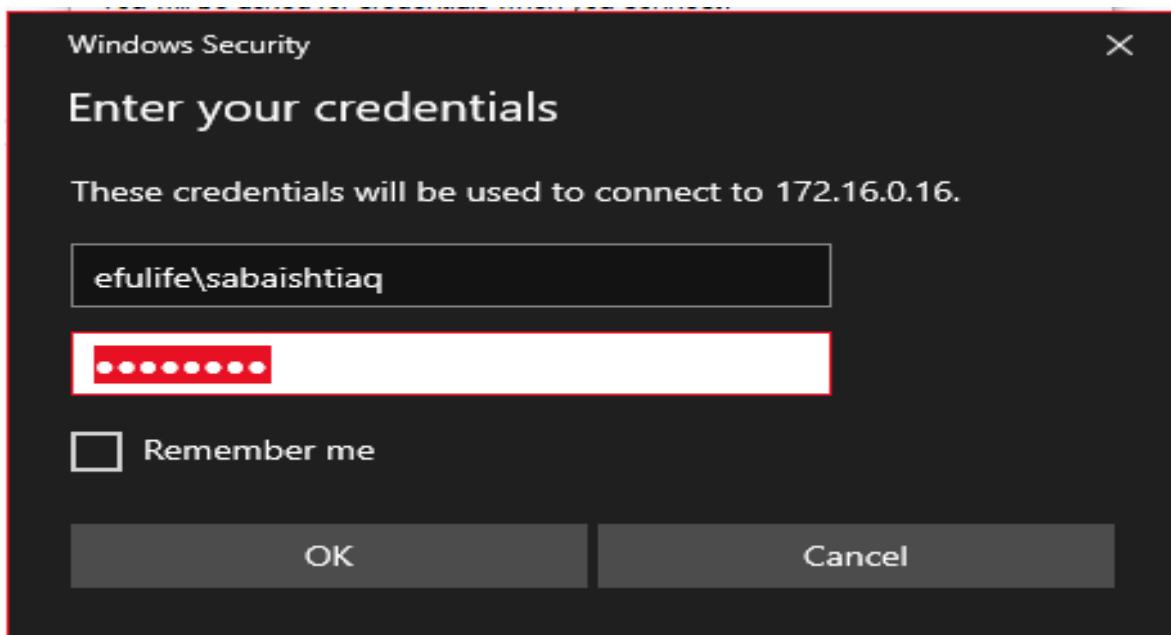

Then enter your system's login credential which you use at office.

For example:

username: abc@efulife.com or efulife\abc

password: abc123**

Then finally you will get the session of your system.
